Multi-Battery Chargers

Model 6068 Parallel Charger

Charges up to 36 batteries, in parallel, in less than 24 hours. Can be wall-mounted or on a stationary bench. 16 charge rates for precise charging. Each battery accepts charge required, depending on size, state of charge and temperature. Engineered so that an initial high charge rate tapers down to a safe finishing level. UL listed. Isolated transformer and a heavy-duty diode rectifier with deep reserve capacity are standard features. Digital voltmeter and digital ammeter improve accuracy and reliability. Use Model 6075 bus bar sets as needed. MADE IN USA.
